

# **Pennsylvania Department of Transportation Section 106 Annual Report - 2023**

Prepared by:

Cultural Resources Section, Environmental Policy and Development Division  
Bureau of Design and Delivery, Highway Administration  
Pennsylvania Department of Transportation  
Date: May 2024

For the:

Federal Highway Administration, Pennsylvania Division  
United States Army Corps of Engineers: Pittsburgh, Baltimore, and Philadelphia Districts  
Pennsylvania State Historic Preservation Officer  
Advisory Council on Historic Preservation

## Table of Contents

I. Introduction .....	1
II. Summary of Projects Reviewed under the PA.....	1

VII. Program Recommendations.....	12

Appendix A: Exempted Projects

Appendix B: Section 106 Project Effect Findings

Appendix C: CRP Map and Contacts

Appendix D: Consultant CRP List Training

Appendix E: District Designee List and Training

## **I. Introduction**

This year's annual report will be the first one where PennDOT is preparing it for reporting purposes to both the Federal Highway Administration (FHWA) and the United States Army Corps of Engineers (USACE) (Baltimore, Philadelphia, and Pittsburgh Districts), as well as to the Pennsylvania State Historic Preservation Office (SHPO) and the Advisory Council on Historic Preservation. Coinciding with the finalized Delegation Programmatic Agreement, PennDOT has also published an updated Cultural Resources Handbook (PennDOT Publication 689, revised 2023), which details our efforts to implement Section 106 of the National Historic Preservation Act regulations regarding projects that have either federal highway-aid from FHWA and/or USACE permits typically under Section 404 of the Clean Waters Act for state highway-funded project.

This annual report, as with past reporting, only pertains to projects within PennDOT's Highway Administration Deputate under the Bureau of Design and Delivery. It does not cover projects funded through the Multimodal Deputate (e.g., passenger rail, freight rail, airports, water ports, etc.) nor does it include projects that are funded strictly by the Pennsylvania Turnpike Commission.

The period covered in this annual review is January 1 and December 31, 2023 and provides summary statistics on: projects exempted from further Section 106 review based on the criteria outlined in the Delegation PA; effect findings (i.e., no effects, no adverse effects, and adverse effects); information on SHPO objections to effects determinations; an update on PennDOT Cultural Resource Professionals (CRPs) and District Designees (DDs) staffing and training to maintain their delegation to review projects under the PA; and finally, a few notable stories which highlight projects that have successfully avoided adversely affecting historic properties or that implemented unique or alternative mitigation.

## **II. Summary of Projects Reviewed under the PA**

The heart of this annual report comes from Section X.D of the aforementioned Delegation PA, which states: "PennDOT will prepare an annual report on the activities carried out under this PA. The report will include a list of projects and findings made by PennDOT and a list of projects exempted under Appendix A. The report may also identify issues and make recommendations for improving the implementation of this PA. PennDOT will submit the report to the signatories of this PA within 90 days from the end of the reporting year and make the report available on its cultural website. The report will serve as the basis for any annual review of this PA that is conducted."

This section provides a statistical summary of projects reviewed by PennDOT Cultural Resource Professionals (CRPs), as well as District Designees (DDs)—District Designees are PennDOT environmental staff in the Engineering Districts who have completed Section 106 training—for exempted projects and describes SHPO disagreements with determinations of eligibility and effect made by PennDOT. The data in the tables below are derived from PennDOT’s online cultural resources public consultation website PATH (Pennsylvania Heritage and Transportation) which can be found at <https://path.penndot.pa.gov/>. The full project details for the exempted projects can be found in **Appendix A**, while the details of the projects where PennDOT made effect findings is found in **Appendix B**.

### **a. Exemptions**

Appendix A of the Delegation PA contains a list of project activities that may be exempted from further Section 106 review provided that the activities meet certain conditions. The activities in the list, with the conditions imposed, should have no potential to effect historic properties. Appendix A is divided into two sections, Level 1 activities and Level 2 activities. Level 1 activities may be exempted by either DDs or CRPs, while Level 2 activities can only be exempted by CRPs.

Between January 1<sup>st</sup> and December 31<sup>st</sup>, 2023, PennDOT exempted 227 federally funded and 210 state-funded projects from further Section 106 review. Of the federally funded projects, District Designees exempted 89 projects, while CRPs exempting 138. District Designees also exempted 105 state-funded projects and CRPs also exempted 105.

### **b. Non-Exempt Projects**

In addition to the 437 projects exempted from further Section 106 review, PennDOT also made 217 effect determinations (157 for FHWA-funded projects and 60 state-funded projects). Of the 227 federal highway-aid project, PennDOT had 119 “no effect” (76%), 29 “no adverse effect” (18%), and nine “adverse effect” (6%).

For state-funded project, PennDOT made 57 “no effect” determinations (95%) and three “no adverse effect” determinations (5%). There were no “adverse effect” determinations made for any state funded projects in 2023.

**EXEMPTED PROJECTS – Federally Funded (FHWA)**

Of the 60 state-funded projects, PennDOT identified nine that required a USACE permit under Section 404 of the Clean Water Act or Section 10 of the Rivers and Harbors Act. Eight of these projects had “no effect” determinations and only one had a “no adverse effect” determination. A table with these projects is listed below.

District	County	SR	Sec	MPMS	Section 106 Effect Finding	USACE Permit
1	Venango	3023	B00	1979	No Effect	PASPGP, Section 404 or Section 10
3	Tioga	4009	22	115841	No Effect	PASPGP, Section 404 or Section 10

### III. Disagreements/Objections by the SHPO on Eligibility and Effects

A large component of PennDOT's project delivery program and consultation under Section 106 relies on the inherent trust placed on it, and built over many years, by the SHPO and FHWA to submit projects without review and/or concurrence. As spelled out in the delegation programmatic agreement, PennDOT is only required to consult with the SHPO on findings of "no adverse effect," under certain conditions as outlined in the Amended PA, and all "adverse effect" findings. PennDOT's CRPs may also consult with SHPO and seek concurrence outside of these scenarios at their discretion. Typically, this may include concurrence on level of identification, mitigation, and other consultation as part of the Section 106 undertaking. In total, PennDOT requested SHPO concurrence 137 times over the course of 2023. Of these, SHPO objected to three PennDOT NR-eligibility determinations (all of these were FHWA-funded projects):

- District 5-0, Berks Co., SR 0419-02B, MPMS# 91908, SHPO Review# 2019PR03588: In 2022, PennDOT determined the Braun Mill (Resource# 1989RE00172) eligible for listing in the National Register of Historic Places under Criterion A for industry and Criterion C for agriculture. At the time the mill was originally determined eligible (in 1989), a boundary was not established for the resource. PennDOT proposed a boundary that SHPO disagreed. In 2023, PennDOT supplied additional information regarding the mill boundary. SHPO continued to disagree stating that “mill is also eligible under Criterion A in the area of agriculture and that the 19th-century stone bank barn contributes to both the Braun Mill and the Tulpehocken Creek Historic District, as it was built during the period of significance and retains sufficient integrity to convey its historical association to the mill as well as to the larger historic district...In our opinion, the NRHP-eligible boundary therefore would include both tax parcels historically associated with the mill as well as the extension of the mills head and tail race.” As the boundary change did not affect the effect determination for the project (the project resulted in an adverse effect from the replacement of a contributing resource [bridge] in the historic district), PennDOT agreed with SHPO to the boundary change.
- District 6-0, Chester Co., SR 0041-STA, MPMS# 110311, SHPO Review# 2021PR01402: An objection that was referenced in the 2022 annual report was resolved in 2023. In March 2023, the FHWA requested a determination from the Keeper of the National Register of Historic Places (Keeper) regarding the on-going disagreement between PennDOT/FHWA and the SHPO concerning the appropriate boundary for the Avondale Historic District, as well as the areas of significance. The Keeper’s office indicated (letter dated 5/22/23) that neither the SHPO’s proposed boundary maps nor PennDOT’s “make sense and need revision”. The Keeper’s office requested additional information to assist in their determination. The parties agreed that a field view with all agencies would be the best course. The Keeper’s representative was unable to attend this field view, but the SHPO, PennDOT and FHWA agreed that they would seek to resolve the issues without the Keeper’s representative’s involvement. A field meeting was held July 26th with PennDOT, FHWA, and the SHPO to discuss the historic district’s areas of significance and the National Register boundary. The SHPO expressed the opinion that pulling the boundary back would cut out several contributing resources and expressed a preference to keep the boundary on the far side of the White Clay Creek, to include the bridge that is included in the project APE. For purposes of advancing the project, PennDOT and FHWA accepted the PA SHPO’s opinion that the Avondale Historic District is eligible under

Criterion A and C with a period of significance of circa 1830-circa 1950 and with the SHPO's proposed boundary that extends over the East Branch of the White Clay Creek.

- District 9-0, Somerset Co., SR 6219-50, MPMS# 115845, SHPO Review# 2021PR06554: PennDOT determined the Piney Creek Lime Kiln (Resource# 2004RE09766) not eligible for listing in the NRHP. SHPO disagreed with this determination and considers it eligible under Criterion C. After further evaluation, PennDOT determined the Lime Kiln is outside the project's area of potential effects and, therefore, does not disagree with SHPO's determination.
- District 12-0, Washington Co., SR 0070-10K, MPMS# 106919, SHPO Review# 2021PR01768: PennDOT determined the John Fry House (Resource# 2023RE04025) eligible for listing in the NRHP. SHPO disagreed with this determination. Based on this decision, PennDOT and FHWA proceeded with the property being considered not eligible for listing.

#### **IV. PennDOT Staff Updates**

PennDOT transitioned Veronica Martin from the bridge marketing coordinator to the new District 8-0 architectural historian; Jeremy Ammerman was promoted to District 8-0 Environmental Manager. Thus, PennDOT still retains a full complement of 12 Cultural Resources Professionals (six architectural historians and six archaeologists), two supervisors (one each for the archaeologists and architectural historians), and one section chief. The bridge marketing position, however, is currently vacant is actively being filled. Contact information for the CRPs and map of their respective Engineering Districts is included as **Appendix C**.

#### **V. Training and Delegation under the PA**

A list of the PennDOT's delegated consultants is found in **Appendix D** and District Designees is in **Appendix E**.

#### **VI. Success Stories**

- District 4-0: Lackawanna County, Benton Township: SR 4005 over D&H RR. Seaman's Road Bridge is a concrete arch structure constructed in 1915 as part of the Delaware, Lackawanna & Western Railroad's Nicholson Cut-Off (DL&WRR). The Cut-Off was a significant engineering effort to eliminate at-grade crossings and reduce grade changes, using reinforced concrete as their main

structural material. The bridge is similar to several others along the line. It is individually eligible and contributes to the eligible DL&W RR. PennDOT, on behalf of FHWA, determined the character-defining features includes the arch ribs, spandrel walls and columns, pier columns, parapets and abutments. They discussed how to best preserve or replace in-kind these features with the PA SHPO and consulting parties during the Section 106 process. Based on the roadway typology, geometry and speed limit, District 4-0 supported a new parapet option with an open pigeon-hole design, similar to the original. It helped maintain the visual lightness of the original parapet. The remainder of elements requiring replacement were done so with in-kind materials and design. The project was consistent with the Secretary of the Interior's Standards for Rehabilitation and the PA SHPO concurred with No Adverse Effect to the bridge and the railroad.

- District 5-0: Schuylkill County, Washington Township: County Bridge #114 (Zimmerman Bridge) over Lower Little Swatara Creek. In 2023, PennDOT completed rehabilitation of the Zimmerman Covered Bridge in Washington Township, Schuylkill County. The c. 1880 structure was listed in the National Register of Historic Places in 1977 for its engineering significance as an intact Burr arch covered bridge. It is one of two left in the county, which once contained fifty-one covered bridges. The County, as owners, carefully considered the crossing's needs at the Zimmerman Bridge and determined it did not need to carry heavy loads, particularly with other crossings of the stream two to three minutes away. This allowed the scope of work to include removal of the steel retrofits installed as part of an earlier rehabilitation. It also included in-kind repairs, and where necessary, in-kind replacement of deteriorated and damaged

SR 4005 in Lackawanna County after Rehabilitation

Zimmerman Bridge after Rehabilitation

members with a goal of arresting continued decline and extend the bridge's useful life. The masonry abutments and wingwalls were repaired and new caps were added to the wingwalls, matching those on the abutments. The exterior was repainted red with white trim. The Burr arch truss is highlighted with white paint on the interior, as it was prior to the rehabilitation. The work was consistent with the Secretary of the Interior's Standards for Rehabilitation and the PA SHPO concurred with the No Adverse Effect determination. Rehabilitation of Zimmerman Covered Bridge is indicative of the County's investment in preserving the region's industrial history.

- District 11-0: Allegheny County, Pittsburgh City: Forbes Avenue over Fern Hollow. In late 2022, Swank Construction Company, the prime contractor for the Fern Hollow Bridge replacement in Pittsburgh, discovered a cast iron post that appeared to be much older than the bridge that had collapsed earlier that year. After careful inspection and research, District 11-0's cultural resources professionals determined that the post originated from the handrailing of the first Fern Hollow Bridge, built in 1901. After some seventy years of service, this original bridge was demolished in 1972 to make room for its replacement. Understanding that it was a unique find that offered an equally unique and low-cost way to showcase the history of the original Fern Hollow Bridge, District 11-0 archaeologist Arron Kotlensky recovered the post and completed initial cleaning in anticipation of restoration work for public display. Swank undertook removal of corrosion and concreted materials on the post, then applied an outdoor-suitable silver paint to reflect the final paint scheme of the bridge at the time of its demolition in 1972. The post, accompanied by an informational interpretive panel, prepared by Arron Kotlensky, was installed on site in January 2024 at a point overlooking the newly completed Fern Hollow Bridge within Frick Park.
- District 12-0: Green County, Rice's Landing Boro: SR 1010 over Pumpkin Run. Archaeology investigation and historic resources studies were undertaken in anticipation of the bridge rehabilitation project slated to occur sometime in 2025/2026. The town of Rice's Landing has a long and fascinating history that begins with its founding by John Rice in 1786. Rice's Landing was a main hub of trade along the Monongahela River throughout the 1800s hosting both commercial and recreational boating facilities. Its prime location on the River between Pittsburgh and points upstream and its proximity to natural resources such as vast reserves of coal, timber and clay vastly contributed to the flourishing of the town. Coal and coke were easy to transport by barge from town given the proximity of the Dilworth mine and its banks of coke ovens right along the riverbank. The mine was later acquired by H.C. Frick and Coke Co, who also contributed to the town's growth, building a company store and company housing. The town boasted many of the conveniences of larger towns and included its own resident steamboat captain and crew, foundries, blacksmith shops, various mills, and factories (e.g., W.A. Young and Sons Foundry and

Fern Hollow Bridge in background with plaque and earlier bridge part in foreground.

Machine Shop, the Excelsior Pottery Works, Vesuvius Manufacturing), and the Rice Landing National Bank. Many of the buildings associated with this booming period between 1810 and the 1930s still remain, including the W. A. Young Machine Shop, Excelsior pottery, Dilworth Mining Complex, Monongahela River Lock #6, the Art Deco bank, brick jail, and a series of vernacular clapboarded Victorian dwellings. PennDOT's archaeological and historical investigations were concentrated on the area around the SR 1010 bridge over Pumpkin Run, or rather two bridges crossing under Route 1010 and the National Register of

Historic Places-listed former Pennsylvania Railroad corridor, now converted to the Green River Trail. While completing an archaeological survey, PennDOT identified the remains of a former blacksmith shop, believed to be associated with Jesse Pinyerd, who operated such a shop near this location sometime between 1876 and 1925. Several liveries, or for-hire horse stables (the taxi cabs of their day), are also denoted on historical mapping of the time in proximity to this blacksmith shop, as would have been common for the purposes of repairs and convenience. While additional excavations of this site would likely contribute to a broader and more nuanced understanding of history of the town, archaeology is a destructive process and archaeologists often must balance a desire to learn about the past with the need for preservation for future generations while also accounting for additional costs to project budgets. Therefore, PennDOT decided that the best solution for this archaeological resource would be to redesign the project to avoid the site and preserve it in place.

## **VII. Program Recommendations**

In February 2024, the parties to the Delegation PA met to discuss the application of the Delegation PA, including participation by the USACE. The FHWA, USACE and SHPO espoused satisfaction with the performance of the PennDOT CRPs and indicated that they did not feel any need to conduct an annual review and monitoring for the 2023 year. This speaks to an overall satisfaction with the performance of the CRPs, the District Designees, and, by extension, the whole of PennDOT in meeting the letter and spirit of Section 106. The parties agreed to meet again in April 2024 to discuss the Delegation PA with the benefit of the information contained in this report. The relatively few objections received would continue to support that the Delegation PA is working to the satisfaction of all parties. As a result, and excepting any concerns raised in the April meeting, few program changes, and no changes to the Delegation PA are warranted. However, PennDOT will continue to work towards particular program goals including fostering Native American input throughout the project delivery process; garnering greater public and consulting party participation; investigating and implementing ways to rehabilitate historic bridges and reduce visual impacts of bridge replacements on historic districts; and developing staff knowledge through regional and national training, workshops, and meetings.

84368	4	No Effect	6/21/2023	Federal Highway-Funded	Lackawanna	Scranton City (Lackawanna)	SR 6011 Green Ridge Street over Lackawanna River	6011	251	2023PR03051	The proposed project involves the replacement of the SR 6011 (Green Ridge Street) Bridge over the Lackawanna River in the City of Scranton. The existing structure consists of two spans. Span one was constructed in 1945 and consists of a riveted steel girder superstructure. Span two was constructed in 1983 and consists of a pre-stressed concrete adjacent box beam superstructure. The existing structure is supported by a combination of concrete and stone masonry abutments. The proposed width for the new structure will consist of two 12-foot lanes, two four-foot shoulders, and sidewalks on both sides of the bridge. In addition, 12-foot left turn lane for Nay Aug Ave and SR 3013 will also be included with the project. Traffic will be maintained through the site during construction via a temporary roadway and temporary bridge, which will be located upstream of the existing structure.	Yes
102030	4	No Effect	5/15/2023	Federal Highway-Funded	Luzerne	Hanover Twp (Luzerne)	SR 2002 Reconstruction	2002	D50	2023PR02303	This project involves reconstruction on State Route 2002 (San Souci Parkway) from Township Road (Loomis Street) to State Route 2005 (Carey Avenue) in Hanover Township, Luzerne County. Work includes pavement reconstruction, drainage, roadside safety improvements and updated traffic signals. Curbing, sidewalks, and bus stop accommodations will be added as appropriate. Bridge work includes replacement of SR 2002/Nanticoke Creek bridge, replacement of the SR2002/Warrior Creek box culvert and the bridge preservation work to the SR 2002/Solomon Creek culvert. Minor in-stream work is anticipated.	Yes

109885	4	No Effect	6/27/2023	Federal Highway-Funded	Wayne	Paupack Twp (Wayne)	SR 590 over Inlet to Lake Moc-a-tec	590	653	2022PR05357	PennDOT District 4-0 proposes to replace a corrugated metal plate pipe culvert, located in Paupack Township, Wayne County. The existing structure carries SR 590 (Purdytown Turnpike) over the Inlet to Moc-A-Tec Lake. The new structure will be either a reinforced concrete box culvert or a reinforced concrete arch. Modifications to both vertical and horizontal alignments will be minimal. Maintaining traffic along SR 590 during construction will be maintained by a temporary run-a-around roadway. During construction, limits of disturbance will be limited to the installation of the new structure (which requires access to the channel), maintaining traffic during construction, and by rebuilding SR 590 in the immediate areas approaching the structure.	Yes
110085	4	No Effect	1/23/2023	Federal Highway-Funded	Luzerne	Huntington Twp (Luzerne)	SR 239 over Pine Creek	239	351	2019PR03437	The SR 0239-351 project involves the replacement of the bridge over Pine Creek in Huntington Township, Luzerne County. The current two-span concrete T-beam bridge will be replaced with a new single span bridge on existing alignment. The project will also include minor approach work and guide rail replacements. Maintenance and protection of traffic will include the implementation of a planned detour.	Yes

96747	4	No Effect	10/23/2023	State-Funded	Wyoming	Laceyville Boro (Wyoming)	4006 over Little Tuscarora Creek	4006	771	2023PR05110	PennDOT District 4-0 proposes to replace the State Route 4006 over Little Tuscarora Creek bridge in Laceyville Borough, Wyoming County, PA. The project includes the replacement of the culvert with minimal approach roadway reconstruction, guide rail replacement, and shoulder widening. The existing structure is a cast in-place concrete arch structure. The proposed structure is a box culvert depressed into the streambed to allow a natural channel substrate to develop. Roadway reconstruction will include full-depth pavement reconstruction and improvements to the intersection with Lacey Street. A detour will be used for traffic control. A temporary pedestrian structure will be provided downstream at the former location of the Franklin Street Bridge—the Franklin Street Bridge was damaged and subsequently closed to vehicular traffic in 2017 before ultimately being removed.	Yes

1E+05	4	No Effect	10/10/2023	State-Funded	Lackawanna	Scott Twp (Lackawanna)	SR 347 over Kennedy Creek	347	253	2023PR04883	PennDOT is proposing a project to replace of an existing culvert carrying State Route 347 (Justus Road) over Kennedy Creek in Scott Township, Lackawanna County, PA. The replacement structure will be a new reinforced concrete box culvert constructed under a detour of approximately four miles. Additionally, approach roadway reconstruction will be included to the limits necessary for the culvert replacement. New guide rail, signing, and pavement markings will be provided with the project. No utility impacts are expected. The project will require both required right of way and temporary construction easements.	Yes
1E+05	4	No Effect	10/16/2023	State-Funded	Lackawanna	Elmhurst Twp (Lackawanna)	T-718 over Roaring Brook	7206	LC5	2023PR03444	PennDOT is proposing to replace the existing structure on T-718 (GC Smith Street) over Roaring Brook in Elmhurst Township, Lackawanna County. The existing single span plate girder steel structure carries two lanes over Roaring Brook will be replaced with a two-span concrete beam bridge. The associated roadway work will include minimal approach reconstruction, guide rail installation, embankment stabilization, gravel bar removal, and signing/pavement marking upgrades. Maintenance and protection of traffic consists of a detour/bypass that will utilize a temporary roadway/bridge which is being constructed for the SR 435 bridge replacement to route GC Smith traffic around the project site.	Yes

84368	4	No Effect	6/21/2023	Federal Highway-Funded	Lackawanna	Scranton City (Lackawanna)	SR 6011 Green Ridge Street over Lackawanna River	6011	251	2023PR03051	The proposed project involves the replacement of the SR 6011 (Green Ridge Street) Bridge over the Lackawanna River in the City of Scranton. The existing structure consists of two spans. Span one was constructed in 1945 and consists of a riveted steel girder superstructure. Span two was constructed in 1983 and consists of a pre-stressed concrete adjacent box beam superstructure. The existing structure is supported by a combination of concrete and stone masonry abutments. The proposed width for the new structure will consist of two 12-foot lanes, two four-foot shoulders, and sidewalks on both sides of the bridge. In addition, 12-foot left turn lane for Nay Aug Ave and SR 3013 will also be included with the project. Traffic will be maintained through the site during construction via a temporary roadway and temporary bridge, which will be located upstream of the existing structure.	Yes
102030	4	No Effect	5/15/2023	Federal Highway-Funded	Luzerne	Hanover Twp (Luzerne)	SR 2002 Reconstruction	2002	D50	2023PR02303	This project involves reconstruction on State Route 2002 (San Souci Parkway) from Township Road (Loomis Street) to State Route 2005 (Carey Avenue) in Hanover Township, Luzerne County. Work includes pavement reconstruction, drainage, roadside safety improvements and updated traffic signals. Curbing, sidewalks, and bus stop accommodations will be added as appropriate. Bridge work includes replacement of SR 2002/Nanticoke Creek bridge, replacement of the SR2002/Warrior Creek box culvert and the bridge preservation work to the SR 2002/Solomon Creek culvert. Minor in-stream work is anticipated.	Yes

109885	4	No Effect	6/27/2023	Federal Highway-Funded	Wayne	Paupack Twp (Wayne)	SR 590 over Inlet to Lake Moc-a-tec	590	653	2022PR05357	PennDOT District 4-0 proposes to replace a corrugated metal plate pipe culvert, located in Paupack Township, Wayne County. The existing structure carries SR 590 (Purdytown Turnpike) over the Inlet to Moc-A-Tec Lake. The new structure will be either a reinforced concrete box culvert or a reinforced concrete arch. Modifications to both vertical and horizontal alignments will be minimal. Maintaining traffic along SR 590 during construction will be maintained by a temporary run-a-around roadway. During construction, limits of disturbance will be limited to the installation of the new structure (which requires access to the channel), maintaining traffic during construction, and by rebuilding SR 590 in the immediate areas approaching the structure.	Yes
110085	4	No Effect	1/23/2023	Federal Highway-Funded	Luzerne	Huntington Twp (Luzerne)	SR 239 over Pine Creek	239	351	2019PR03437	The SR 0239-351 project involves the replacement of the bridge over Pine Creek in Huntington Township, Luzerne County. The current two-span concrete T-beam bridge will be replaced with a new single span bridge on existing alignment. The project will also include minor approach work and guide rail replacements. Maintenance and protection of traffic will include the implementation of a planned detour.	Yes

The project includes the replacement of the culvert with minimal approach roadway reconstruction, guide rail replacement, and shoulder widening. The existing structure is a cast in-place concrete arch structure. The proposed structure is a box culvert depressed into the streambed to allow a natural channel substrate to develop. Roadway reconstruction will include full-depth pavement reconstruction and improvements to the intersection with Lacey Street. A detour will be used for traffic control. A temporary pedestrian structure will be provided downstream at the former location of the Franklin Street Bridge—the Franklin Street Bridge was damaged and subsequently closed to vehicular traffic in 2017 before ultimately being removed.	Yes

1E+05	4	No Effect	10/10/2023	State-Funded	Lackawanna	Scott Twp (Lackawanna)	SR 347 over Kennedy Creek	347	253	2023PR04883	PennDOT is proposing a project to replace of an existing culvert carrying State Route 347 (Justus Road) over Kennedy Creek in Scott Township, Lackawanna County, PA. The replacement structure will be a new reinforced concrete box culvert constructed under a detour of approximately four miles. Additionally, approach roadway reconstruction will be included to the limits necessary for the culvert replacement. New guide rail, signing, and pavement markings will be provided with the project. No utility impacts are expected. The project will require both required right of way and temporary construction easements.	Yes
1E+05	4	No Effect	10/16/2023	State-Funded	Lackawanna	Elmhurst Twp (Lackawanna)	T-718 over Roaring Brook	7206	LC5	2023PR03444	PennDOT is proposing to replace the existing structure on T-718 (GC Smith Street) over Roaring Brook in Elmhurst Township, Lackawanna County. The existing single span plate girder steel structure carries two lanes over Roaring Brook will be replaced with a two-span concrete beam bridge. The associated roadway work will include minimal approach reconstruction, guide rail installation, embankment stabilization, gravel bar removal, and signing/pavement marking upgrades. Maintenance and protection of traffic consists of a detour/bypass that will utilize a temporary roadway/bridge which is being constructed for the SR 435 bridge replacement to route GC Smith traffic around the project site.	Yes
